Portfolio

Pallabi, Dhaka, Bangladesh

tanjidhasan41

## CAREER OBJECTIVE

Software QA Engineer with 1.5+ years of experience in manual and automation testing across web, mobile and API platforms. Proficient in Playwright, Selenium, TestNG, Rest Assure, Postman, Appium and JMeter, with hands-on experience testing Fintech, E-commerce and Enterprise SaaS applications. Skilled in designing test scenarios, executing automated and manual tests and ensuring software quality within Agile development environments.

## EXPERIENCE

### Junior Software QA Engineer

#### meldCX

October 2025 – Ongoing

Dhaka, Bangladesh

- **Test Planning & Execution**  
Reviewed test plans and prepared multiple test cases per release cycle, ensuring structured coverage across functional and regression scenarios.
- **Android Testing**  
Executed Android regression automation suite each release cycle using Appium, covering 25+ test scenarios and 170+ test cases across 3 devices.
- **Web Testing**  
Executed manual testing for web-based applications and developed automated regression test scripts using Playwright and identifying around 16 issues.

### Junior Software QA Engineer

#### AKIJ iBOS

November 2024 – September 2025

Dhaka, Bangladesh

- **Automation**  
Built the automation structure and initial test scripts for the Akij Air project, enabling repeatable regression testing from scratch.
- **Feature delivery**  
Owned end-to-end testing of the complex Pop-up Form feature in the Form Builder app, covering functional, regression, and edge-case scenarios through to delivery.
- **Shopify**  
Ensured release-ready quality for the GearNest Shopify theme through functional, UI, and cross-browser testing across product, cart, and checkout workflows.

## EXPERTISE

- **Manual Testing:** Smoke and Sanity Testing, Regression Testing, System Testing, Performance Testing, UAT, Usability Testing, Requirement Analysis, Test Planning, Designing, Writing and Reviewing Test Cases, Test Execution and Evaluation, Creating Test Report, and Bug Reporting using Test Management Tools
- **Agile Methodology and Project Management Tool:** Jira, Scrum
- **Performance Testing Tool:** JMeter
- **API Testing Tool:** Postman, Newman
- **Programming Languages:** OOP with Java, JavaScript
- **Test Automation Tools and Frameworks:** Playwright, Selenium, Junit, TestNG, Rest Assured, Mocha and Axios, Appium
- **Database:** MySQL
- **Version Control:** GIT (GitHub)
- **Operating System:** Windows

# ACHIEVEMENTS

Successfully completed the Full Stack SDET course from Road to SDET, consistently ranking among the top 3 participants for three consecutive months and achieved the **Best Performance Award**.

# PROJECTS

- Professional Projects**
  - meldCX Core**
    - An enterprise SaaS platform for managing Android devices, Windows agents, kiosks, and cloud-based deployments across distributed business environments.
  - Western Union**
    - A global digital financial services platform supporting international money transfers, payment processing, and compliance-driven transaction workflows.
  - AKIJ Air**
    - A Bangladesh-based online travel agency platform supporting flight booking, hotel reservations, tour packages, and visa processing with multi-method payment integration.
  - Shopify**
    - An e-commerce platform project supporting online stores, product management, shopping cart functionality, and checkout processes.
- Hands-on Personal Projects**
  - nopCommerce Automation using Playwright**: Automated e-commerce workflows including authentication, cart, and checkout validation.
  - Daily Finance Web Automation using Playwright**: Automated critical web workflows and UI validations.
  - Daily Finance Web Automation using TestNG**: Selenium-TestNG framework implementing Page Object Model for web automation.
  - API Automation using Rest Assured**: Automated REST API validation for requests, responses, and workflows.
  - Android App Automation**: Appium-based Android automation covering user flows and regression scenarios.
  - Database (MySQL) Testing**: Database testing project focused on data validation and integrity checks.
  - D-Money API Testing using Postman**: API testing project covering authentication, transactions, and data validation.
  - Performance Testing using JMeter**: Evaluated application performance, stability, and response times under load.
  - D-Money Manual Testing**: Manual testing project covering test execution, validation, and bug reporting.
